

Five Levels of a Smart Home

What?

- Learn the difference between smart products and a smart home and how to communicate that efficiently to your clients to educate and help them understand their technology options.
- Understand the difference between DIY vs. Pro install and how professional technology can improve wellness in the home for those of all ages and abilities.
- Learn where smart home technology is going and how the “helpful home” provides more comfortable and safer living experiences and conditions.

Kim Parker, has a wealth of knowledge and experience in the home automation and control arena. His background in product innovation brings a unique insight into both the homeowner and business needs. He has a passion for the smart home industry and loves to share about the opportunities.

Control
